

Digital Product Passport (DPP)

INTRODUCTION

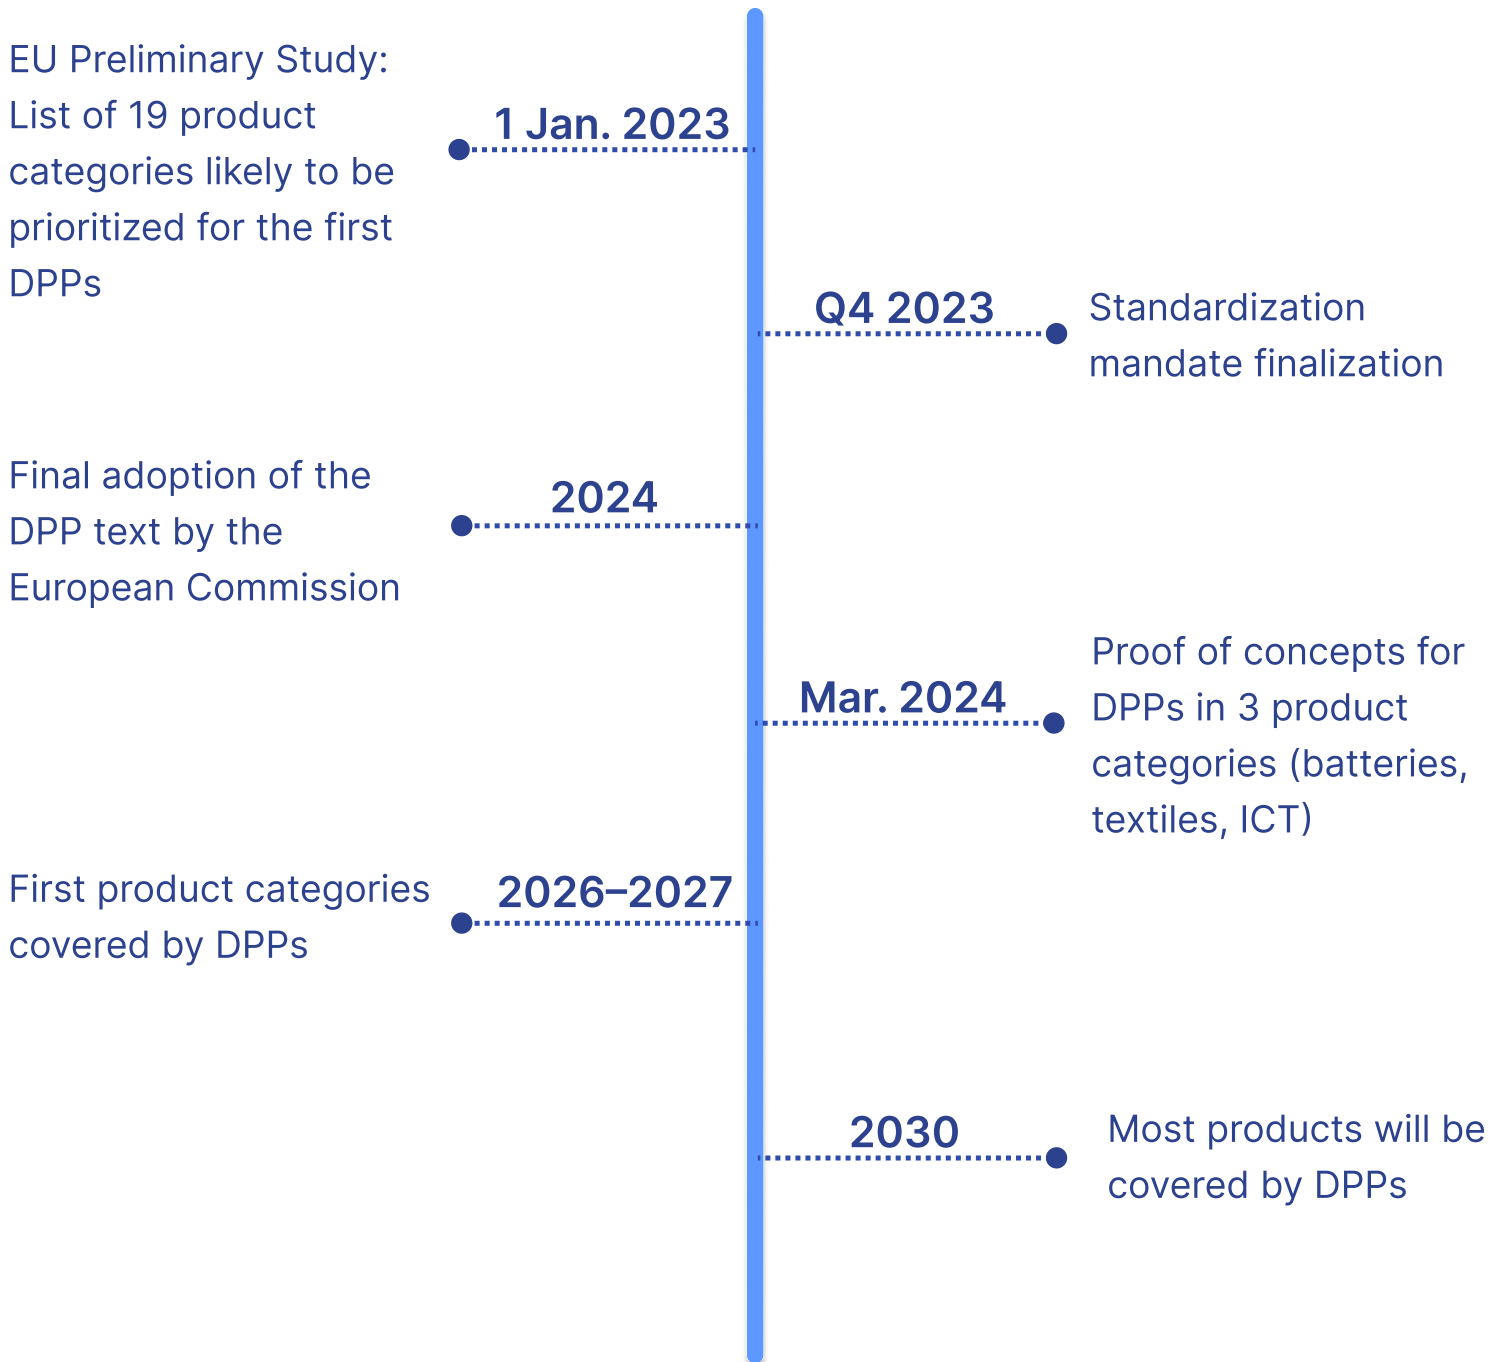

The DPP is a digital document that records a product's sustainability and circularity information from its design phase to its end-of-life, including:

- Origin
- Composition
- Environmental impact
- Repair options
- Recyclability of different components

REQUIREMENTS

- **All products sold in the EU market** (manufactured and imported) will be subject to this **requirement** (excluding food and medicinal products).
- The passport must be connected through a data carrier (**QR code**,...) located on the product, its packaging, or in the accompanying product documentation.
- The information should include references to the product's **model, lot, or item**.

SCHEDULE

HOW PRODUCT DNA CAN HELP

Get prepared for the upcoming **DPP** regulation with our **3-step** methodology :

- Supply chain discovery
- Supplier due diligence
- Traceability and Transparency
